ABOUT LIVEU

LiveU sets the standard for high-quality and reliable live video acquisition, management and distribution over IP. LiveU's award-winning technology enables live video transmission from any location around the world with lightweight, easy-to-use equipment. With top-tier customers in 60+ countries, LiveU's solutions are used daily for breaking and developing news, and high-profile events.

LiveU offers a complete range of devices and services for live video coverage. LiveU's field solutions aggregate multiple cellular and other network links, which are optimized for maximum video quality based on the available network conditions. LiveU developed and patented the technology for cellular bonding for remote news gathering in the US and other countries.

LIVEU ECOSYSTEM

01 ACQUISITION DONE RIGHT

Our award-winning field units are at the core of the LiveU ecosystem. Representing the most advanced bonded cellular technology available today, all LiveU field units are designed to make newsgathering easier than ever.

02 POWERFUL MANAGEMENT

Receiving inputs from all of the field units, the LiveU Central management platform enables full monitoring and control of the entire ecosystem via any browser-supported computer or mobile device, from anywhere around the world.

LiveU Central delivers a range of powerful cloud-based value-added premium services, tailored to everyday professional video workflows.

01 ACQUIRE

02 MANAGE

03 DISTRIBUTE

03 WORLDWIDE DISTRIBUTION

Once video has reached the studio it becomes an important part of your ingest workflow. LiveU MultiPoint seamlessly integrates into that workflow allowing you to share incoming live feeds with multiple end-points.

MultiPoint needs no additional expensive hardware or devices – it works on the same LiveU Central platform you work with daily, for efficient content distribution over any IP infrastructure.

PRODUCT PORTFOLIO

Field Units

- LU500** Containing 6-8 modems and proprietary antenna technology, LiveU's flagship cellular-bonding unit is the most robust of its kind, yet smaller and lighter than ever
- LU200** Ultra-Small, cost-effective unit with 2+ modems, makes it easier to deploy cellular-bonding with more field crews, or for use as a stand-alone Ethernet video encoder
- LU200e** The most versatile, cost-effective contribution encoder on the market

Vehicle Solutions

- LU700-SV** The hybrid video encoder for vehicles and fixed locations
- LiveU Xtender** External antenna for extra-strong resiliency in extreme scenarios

Software & Mobile

- LU-Smart** Bonded transmission for mobile phones and tablets
- LU-Lite** The bonded software solution for Mac OS
- LiveU Central** Cloud-based management platform for preview and remote control
- LiveU MultiPoint** Easily share feeds between multiple destinations
- LiveU Community** Connects video professionals with top international broadcasting networks
